

## ifo Employment Barometer rises

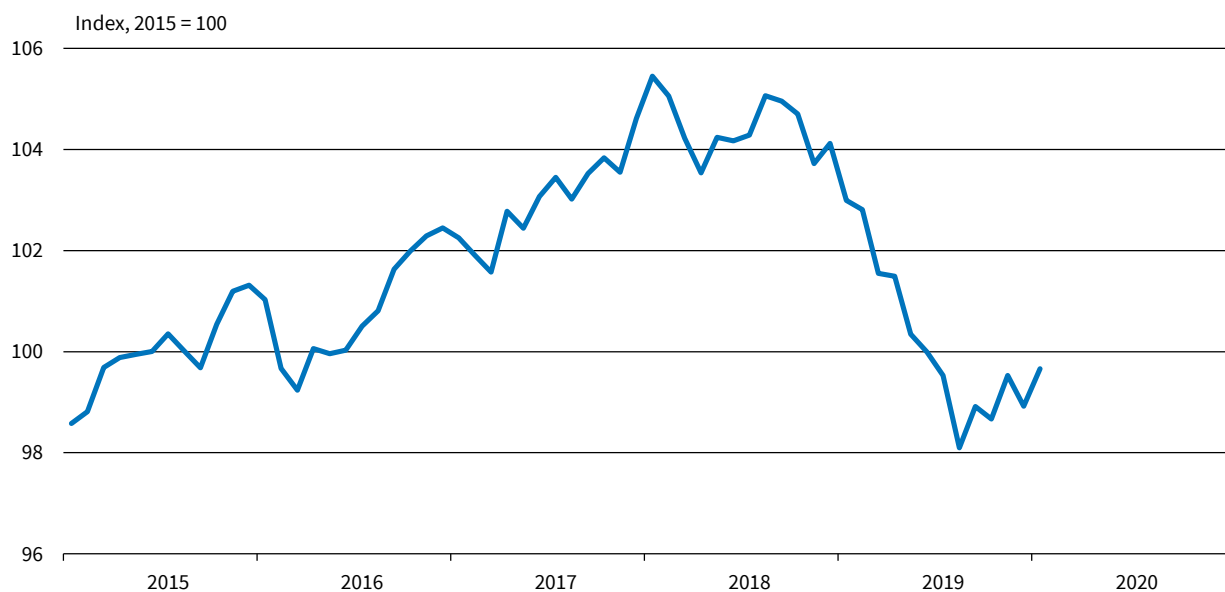

Munich, January 29, 2020 – **German companies are once again looking to intensify their recruitment efforts. The ifo Employment Barometer rose to 99.7 points in January after measuring 98.9 points in December. This is its highest value since June 2019. The German labor market is starting the new year in an optimistic mood.**

This increase was driven by developments in service providers' business. Here, the value rose to its highest level since March 2019. Architectural and engineering firms in particular want to hire more employees, but demand for new staff continues to be high in the IT sector. The number of employees in the construction industry is also rising steadily. In contrast, recruitment activity among traders is subdued at the moment, and companies in the manufacturing sector want to reduce headcount.

**For long time series in Excel format, please see [www.ifo.de/en/umfragen/time-series](http://www.ifo.de/en/umfragen/time-series).**

The ifo Employment Barometer is based on around 9,000 monthly responses from businesses in manufacturing, construction, wholesaling, retailing, and the service sector. The companies are asked to report on their **employment plans** for the coming three months. They can describe their plans for the number of employees for the coming six months as “increasing,” “stable,” or “decreasing.” The **balance** value of their plans is the difference in the percentage shares of the responses “increasing” and “decreasing.” To calculate the **index value** the balances are normalized to the average for the year 2015.

The ifo Employment Barometer is calculated exclusively for *Handelsblatt*.
