Further information

since 08/2005
Current situation
We consider our state of business to be

0=bad 50=satisfiable 100=good

Other than the variable **2.1)** statebus the state of business is rated based on a visual analog scale

Appraisal of the state of business (VAS)

online only

The presentation of the online-Slider changed over the last years (e.g. sometimes a dash was displayed in the middle of the slider or the exact number that was clicked). Therefore an accumulation at 50 and other round figures is observable. Without these features displayed the distribution is smoother.

till 01/2017: presentation with dash in the middle, without the exact number clicked and with label in the middle of the slider

02/2017-12/2018: presentation with dash in the middle, with the exact number clicked and label in the middle of the slider

since 01/2019 presentation without dash in the middle, without the exact number clicked but with label in the middle of the slider

Range of orders in months (end of prev. Month)

Note
Due to the alignment of economic cycle surveys inside of the EU the wording of the questions was adapted to the survey periods of the countries. This would have caused the questions regarding the range of orders to be shifted by about one month.
That is why the question regarding the range of orders was posed twice since the first quarter of 2002, with the distinction that it is inquired after the running month (ranord) and the previous month (ranord2)

The figure displays a timeline of variable spans from 1991 to 2030. The timeline is divided into segments by alternating light blue and light yellow horizontal bars. A legend in the bottom right corner identifies the colors: dark blue for 'WEST' and light blue for 'EAST'. The timeline shows a complex pattern of overlapping and non-overlapping segments across the years.
